

**Cambridge Specialty Company, Inc. is now using PreVeil**

The DoD requires all defense contractors and organizations handling CUI to meet CMMC Level 3 compliance standards. Popular email and file-sharing systems like O365, GSuite, and Dropbox are not CMMC compliant.

**Cambridge Specialty Company, Inc.** has chosen PreVeil's Email and Drive solution because it's simple, secure, and compliant technology solution will allow us to store and share CUI with our supply chain while keeping our existing email infrastructure in place.

**What is PreVeil**

PreVeil is an encrypted email and file sharing solution that provides uncompromised security for protecting and exchanging CUI. All user data is only ever encrypted and decrypted on a user's device—and never on a server.

Because PreVeil uses cryptographic keys rather than passwords, CUI cannot be viewed with stolen passwords, a compromised administrator's credentials, or by accessing a breached server.

**How to get started:**

For Mac copy + paste into your browser:

<https://preveil.com/install-latest-release/>

For Windows copy + paste into your browser:

<https://preveil.com/install-latest-release/>

**For support questions:**

For further support or questions about installing PreVeil, please reach out to PreVeil Support at [support@preveil.com](mailto:support@preveil.com).

**Sales and compliance-related inquiries:**

If your organization is interested in learning more about PreVeil for your own compliance requirements, please reach out to Emily deBettencourt at [emily@preveil.com](mailto:emily@preveil.com) and mention **Cambridge Specialty Company, Inc.**
